

Technical Request

1. The product exterior shall show no obvious shrinkage, underfilled injection, broken corners, or cracks;
2. The product allows for counterweights, with the dynamic unbalance not exceeding 1g at a peripheral speed of 750±50 r/min, and no more than 5 balance weights (each weighing no more than 4.5g);
3. The radial runout of the fan blades shall not exceed 2mm, and the axial runout shall not exceed 2.5mm;
4. There shall be 7 blades evenly distributed along the circumference;
5. Unspecified tolerances shall comply with the standard GB/T14486-MT3;
